

A Special Thank You to the Architects and Engineers of this Magnificent Peace Landmark

Dear friend,

It gives me great pleasure to introduce you to the architects and engineers who designed this magnificent Maharishi Peace Palace for Lebanon.

The architectural drawings were developed in collaboration with Maharishi Vastu Architects Christian Schweizer and Jonathon Philips at MERU, and Architect Zaher Ghossaini driving the team in Lebanon. As seen in the photos, the building's exterior design incorporates the Vedic style of architecture. The nine two-story Vedic arches standing in one row give the building a unique, elegant, and majestic appearance. Not to mention the expansive central gable on the roof, which offers a breathtaking view of the surrounding beauty. We can

confidently state that it is exactly how Maharishi envisioned a Maharishi Peace Palace should look like.

Also, we are proud to say that the structural, mechanical, electrical, and plumbing plans were thoroughly studied by a team of highly skilled experts who made sure to adopt innovative eco-friendly systems to comply with the very strict Vedic requirements in order to create and maintain as pure an atmosphere as possible within and around the Peace Palace at all times. We are extremely grateful for the excellent service they offered in a generous amount of patience and care.

You have done an outstanding job especially the team in Lebanon consisting of *Zaher Ghossaini* (Architect), *Fadi Boustany* (Structural Engineer), *Oussama Reddy Eldine* (Structural & Seismic Engineer), *Bassel Copty* (Electrical Engineer), and *Shady Sfeir* (Mechanical Engineer). God bless all of you!

If you're wondering when this project will be implemented in Lebanon, look no further. The answer is largely dependent on your and everyone else's help. The more hands we join, the more likely it is that it will happen very soon.

There are numerous ways in which you can assist. All information is available on our website, "Maharishi Peace Palace Lebanon" (www.mpplebanon.org). You can also contact us directly if you have any questions.
