

## A Vital Element for Lebanon's Wellbeing and Progress!

Dear friend,

Maharishi Peace Palaces are vital elements in the transformation of any society and achieving national invincibility. Participating in building one in our country is a wonderful undertaking and a great opportunity to produce an influence of harmony and peace and bring knowledge and experience of the total potential of Natural Law to everyone thus ensuring the wellbeing and progress of the whole country for many generations to come.

In July 2004, Maharishi invited all who aspire to establish peace, prosperity, and happiness in their motherland to build peace palaces, permanent homes for total knowledge and peace-creating technologies. Having such a mansion in our country will surely raise its population above the reach of problems and suffering.

*“Participate in building Peace Palaces — from every consideration it is very, very necessary that these Peace Palaces are built overnight without waste of a day or night. Then from that day, we have the world in Heaven.”*

~ Maharishi Mahesh Yogi

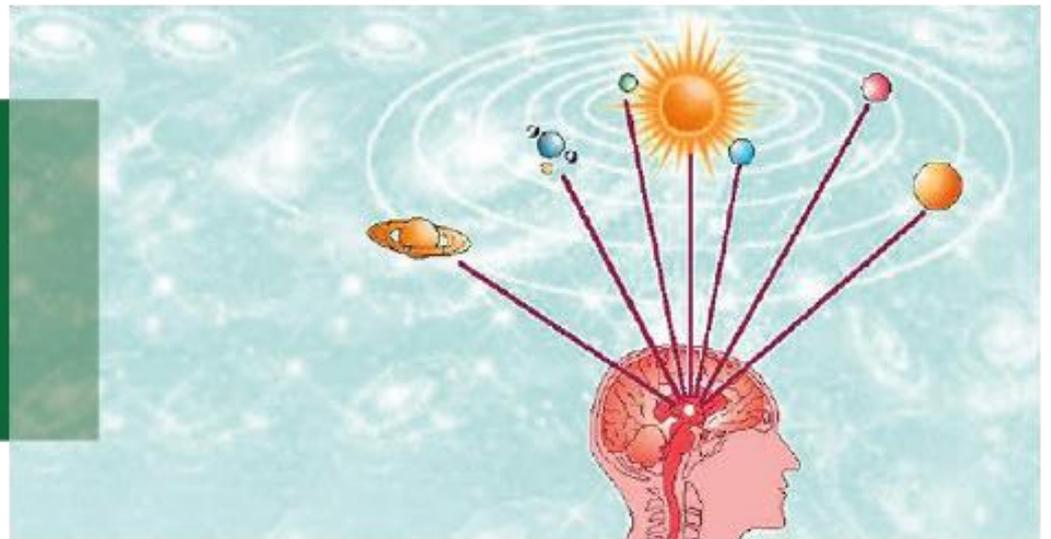

## **A Formula for Generating Peace and Prosperity**

In building a Maharishi Peace Palace, we are setting the very basic foundation for generating stability, peace and prosperity in our country. The unique structure of the building, which is designed and built entirely to Maharishi Sthapatya Veda, principles based on Natural Law and cosmic energies, will ensure a healthy and peaceful environment within the building and its surrounds. And the various exceptional programmes, courses and activities offered in its different facilities will raise individual consciousness and create greater coherence in the larger population.

### **1. Fortunate-Creating Facility**

The Maharishi Peace Palace is by far a fortunate-creating facility promoting perfect health and supporting all activities carried out by individuals residing or working within it.

Living and working in a Sthapatya building aligns individual consciousness with all the Laws of Nature and makes life easy, peaceful and fortunate.

## 2. Enlivening the Full Potential of the Individual

Practising Transcendental Meditation programmes in the Peace Palace has a profound impact on the quality of one's programmes, enlivening one's full potential on all levels.

Living in a Sthapatya building enhances deeper experiences of Transcendental Consciousness and promotes greater peace within and without.

## 3. Radiating Coherence

The Maharishi Peace Palace will host groups of experts in technologies of consciousness to radiate coherence and peace throughout its surrounding environment and the whole country, at all times.

A group of experts in scientifically proven technologies will reside in the Maharishi Peace Palace permanently to produce a predictable and measurable effect of orderliness, harmony, and affluence in the larger population.

## 4. A Reservoir of Total Knowledge

The Maharishi Peace Palace will provide a perfect place for personal development and growth. Visitors and course participants will enjoy a myriad of residential courses, programmes, seminars, and celebrations in a tranquil, nourishing and unifying ambience.

Residential courses, programmes and seminars will be held regularly in the Peace Palace to raise individual consciousness and create greater coherence in society at large.

You can help by spreading the news about the project. Also, you can make a donation.

Thank you in advance for your support! Every contribution takes us one step closer to achieving our goal.
